Weaving Our Own Web
A day school in London
Sat 13 Jan 2018

10.30am-5pm

Location: 2 Canonbury Villas, London N1 2PN. The venue is fully wheelchair-accessible. <u>See map</u>

<u>https://www.peacenews.info/node/8853/weaving-our-own-web</u>

A Peace News dayschool for campaigners who want to learn more about online tools that can help them with their groups, and help them win their campaigns. It's for people who are just starting out learning the basics, and for folk who want to improve their skills…

WORKSHOPS

Privacy and free speech online.
Jim Killock.
Whatever happened to the decentralised bottom-up ideals of the internet? How can we defend free speech online, challenge draconian web-blocking and unmask invasive surveillance?

Win with Wordpress.
Kirk Jackson.
How to set up a campaign website using the popular content management system.

Practical privacy.
Usayd Younis.
• Assess your current level of security as well as your needs.
• Understand security threats.
• Which digital tools and services can you trust and how do you know?

Campaigning with social media.
Chris Henderson .
How you can use social media to win your campaign.

A Free and Open Internet.
OpenMedia.
The Internet was created for sharing and connecting, but out-dated businesses and governments want to control it. This workshop will help you understand digital security & communicate securely.

I don't know anything.
Peace News.
Basics of computers and the internet as a campaigner. Broadband providers; Browsers; Email; Internet search. Ethical and privacy-conscious alternatives.

Coding for Campaigners.
Benjamin.
Well-written computer programs can read like poetry. Computers don't always do what we ask. Understanding more about machine languages will help in everything you do with computers.

Welome to free software.
Free software advocates.
See and try various alternatives to MS Windows or Mac OSX. Help to install a free operating system on your own laptop if you like.

Weaving Our Own Web
A day school in London - Sat 13 Jan 2018

BIOS
